

Membrane Technologies for Every Purification Need

QUA leads the way in cutting-edge membrane technologies for challenging water and process applications, driven by innovation and a dedicated global team.

About Us

QUA is a world-leading membrane manufacturer with a dedication to quality, reliability and customer services. Our solutions include electrodeionization, ceramic and polymeric ultrafiltration, and submerged membranes for applications.

Customer Support

Supporting our customers from concept design through operation

Innovation

Over 20 years of continuous product development

Application Excellence

Over 2,000 membrane installations in 30 countries

Quality Manufacturing

140,000 sq. ft. manufacturing to the highest quality standards

Proven World-Leading Technology

Mining

Niobec Mine, Canada

Ultrafiltration pretreatment for complex mine wastewater, reducing chemical use and minimizing sludge generation.

Refining

ETHYDCO Refinery, Egypt

Electrodeionization for pure water production at Egypt's first full zero liquid discharge petrochemical complex.

Automotive

Automotive Parts Manufacturer, Italy

Ceramic ultrafiltration technology for oil removal from rinse water, enabling water reuse and ensuring long service life.

Pharmaceutical

Leading Pharmaceutical Company, India

Membrane bioreactor deployment to treat challenging organics-laden wastewater for on-site reuse.

Our Products

Q-SEP®

Hollow Fiber Ultrafiltration

Produces high-quality water suitable for RO pretreatment for various applications.

- Lower filtrate turbidity
- High surface area
- Modular configuration

FEDI®

Fractional Electrodeionization

Hardness, silica and boron reduction for polishing and ultrapure water treatment.

- Hardness reduction and demineralization
- High product quality
- Patented two-stage separation process

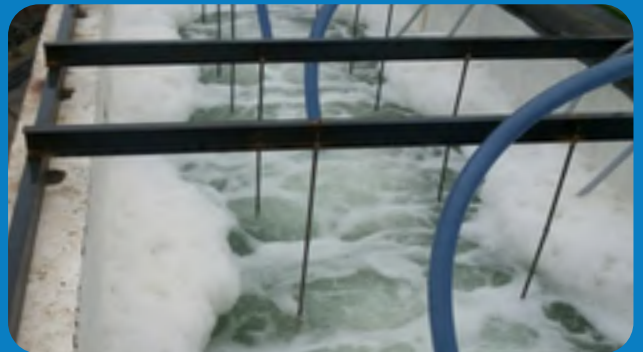

EnviQ®

Submerged Ultrafiltration

Robust PVDF submerged membranes for use in membrane bioreactor wastewater treatment.

- Increased effluent quality
- High scrubbing efficiency
- Compact design

CeraQ®

Ceramic Membranes

High-quality filtration and contaminant removal for challenging water and process applications.

- High durability
- Fouling resistance
- High-temperature operation and cleaning

Corporate Headquarters

QUA Group LLC
One Four Coins Drive
Canonsburg, PA 15317 USA

Eastern Offices

QUA Water Technologies, Pvt. Ltd. Unit 1:
Plot No. 35,T—Block, MIDC,
Bhosari, Pune 411026 India

QUA Water Technologies, Pvt. Ltd. Unit 2:
A-87/2, MIDC, Kurkumbh,
Tal. Daund, Pune 413802 India
